

# GitHub Desktop

# Paso 1: Descargar e Instalar

# Paso 2: Configurar

# Paso 2: Configurar

- 2 In the "Options" window, on the **Accounts** pane, click the **Sign In** button next to "GitHub.com".

# Paso 2: Configurar

- 3 In the "Sign in Using Your Browser" modal window, click **Continue With Browser**. GitHub Desktop will open your default browser.

**Warning:** Authenticating to GitHub using your username and password is not supported. We require authenticating using the browser instead.

- 4 To authenticate to GitHub, in the browser, type your GitHub.com credentials and click **Sign in**.

Alternatively, if you were already signed in to GitHub, follow the prompts to return to GitHub Desktop to finish authenticating.

- 5 If you have configured two-factor authentication (2FA) for GitHub, do one of the following:

- If you set up 2FA via SMS, retrieve your 2FA code from an SMS message.
- If you set up 2FA with a TOTP application, generate a 2FA code.

Then enter your 2FA code in the prompt on GitHub and click **Verify**.

- 6 After GitHub authenticates your account, follow the prompts to return to GitHub Desktop.

# In situ {main} ejercicios.php

A screenshot of a Windows Notepad window titled "ejercicios - Notepad". The window contains the following PHP code:

```
<?php
/**
 * 1. Muestra los números del 1 al 10
 */
    echo "<br><br> 1 BEGIN <br><br>";
    echo 'Hecho con while <br/>';
    $i = 1;
    while($i<=10){
        echo $i . ' ';
        $i++;
    }
    echo '<br/>';
    echo 'Hecho con for <br/>';
    for($i = 1;$i<=10;$i++){
        echo $i . ' ';
    }
    echo "<br><br> 1 END <br><br>";
    echo "<hr>";
```

The status bar at the bottom shows "Ln 1, Col 1", "100%", "Windows (CRLF)", and "UTF-8".
